Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

This action is responsive to the communication filed September 13, 2004.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 16-18 and 21-42 are rejected under 35 U.S.C. 103(a) as being unpatentable over Linkner, Jr. in view of Honobe et al.

Linkner shows a mounting apparatus for a brake control unit including three mounting points. The center of the bracket 12 is read as the support structure with three L shaped members integrally connected thereto. Linkner does not disclose a reservoir. Honobe et al teach a mounted brake control unit which includes a reservoir. It would have been obvious for one of ordinary skill in the art at the time the invention was made to have used the Linkner apparatus to mount a unit such as that of Honobe et al, which can reasonably be described as mounting a reservoir.

Applicant's remarks have been fully considered but are not deemed to be persuasive. It is true that Linkner does not discuss isolating a reservoir from torsional stresses. However, Linkner shows the same mounting structure in the same environment as the claimed device and the issue is whether it is inherent to Linkner that the recited function will be performed. It is clear that the Linkner structure is capable of isolating the brake components thereof from torsional stresses, since it is the same as applicant's. Mounted in a vehicle, it is likely that torsional stress will be present. The Examiner's opinion is that the claimed subject matter is inherent to Linkner.

As to the new claims, the Linkner apparatus can be fairly described as separate parts integrally connected.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Fox whose telephone number is 703-308-2595. The examiner can normally be reached on Maximum Flextime.
